

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

1. (Currently Amended) A method comprising:
a process of dry-wet spinning using of a cellulosic Lyocell fibre ~~of the Lyocell type~~
~~produced using a dry-wet spinning process, and using the fibre~~ in carpets, textile
flooring materials, ~~wall linings and/or decoration materials~~, wherein:
a ratio V of the strength of the fibre in the conditioned state (cN/tex) to the fibre
elongation in a conditioned state (%) amounts to 2.2 or less and the titre of the fibre
amounts to 6 to ~~[[25]]~~ 15 dtex.
2. (Previously Presented) A method of use according to claim 1, wherein the ratio
V amounts to 2.0 or less.
3. (Previously Presented) A method of use according to claim 1, wherein the ratio
V amounts to 1.8 or less.
4. (Previously Presented) A method of use according to claim 1, wherein the ratio
V amounts to at least 1.
5. (Cancelled)
6. (Previously Presented) A method of use according to claim 1, wherein the titre
of the fibre amounts to 6.5 dtex to 25 dtex.

7. (Previously Presented) A method of use according to claim 1, wherein the titre of the fibre amounts to 12 dtex to 25 dtex.

8. (Previously Presented) A method of use according to claim 1 in the form of a staple fibre.

9. (Cancelled)

10. (Previously Presented) A method of use according to claim 6, wherein the titre of the fibre amounts to 15 dtex to 25 dtex.

11. (Cancelled)

12. (Withdrawn) A carpet, textile flooring material, wall lining and/or decoration material compiled by a process comprising the steps of:

providing a cellulosic fibre of the Lyocell type produced using a dry-wet spinning process, wherein a ratio V of the strength of the fibre in the conditioned state (cN/tex) to the fibre elongation in a conditioned state (%) amounts to 2.2 or less and the titre of the fibre amounts to 6 to 25 dtex; and

producing the carpet, textile flooring material, wall lining and/or decoration material from at least the cellulosic fibre.
